Summary

Full Stack Web Developer who builds responsive web applications from the ground up and carries projects through every phase, from requirements to deployment. Experienced across client side and server side work with JavaScript, jQuery, PHP, and Node.js, with a focus on scalability, performance, and reliability, and comfortable switching between languages and platforms as a project demands. Strong background in JSON based RESTful API development and integration, Git version control, and test driven CI/CD workflows. AWS Certified Developer with WordPress deployment and Adobe Photoshop experience alongside core development skills.

Technical Skills

Languages	JavaScript, TypeScript, PHP, HTML5, CSS3, C Sharp, Java, Python, SQL
Client Side	jQuery, React, Next.js, Responsive Web Design, DOM Manipulation, WCAG Accessibility, Cross Browser Development
Server Side	PHP, Node.js, Express.js, NestJS, .NET/C#, RESTful APIs (JSON), API Integration, Server Side Architecture
Security	Authentication & Authorization, Input Validation, Secure API Design, Environment & Secrets Management
Databases	PostgreSQL, MongoDB, SQL, Azure SQL, SQLite, Schema Design
Cloud/DevOps	AWS (Fargate, ECR, SNS, SQS), Linux, Docker, Kubernetes, GitHub Actions, CI/CD Pipelines, Automated Testing
CMS & Design	WordPress, Adobe Photoshop, Figma
Version Control	Git, GitHub, Azure DevOps
AI Tools	GitHub Copilot, Claude Code, Prompt Engineering, AI Assisted Development

Professional Experience

Front Associate

February 2026 – Present

Splitsville Bowl

Kingston, ON

- Operate front desk technology and POS systems daily, troubleshooting operational issues in a fast paced team environment.

Research Intern – Full Stack Developer

Jan. 2025 – April 2025

Lambton College

Sarnia, ON

- Built and maintained a cost performance analytics dashboard from the ground up, sustaining 99.8% uptime through attention to reliability and error handling.
- Developed server side functionality in C#/.NET, implementing services and supporting integration between backend endpoints and client side components.
- Built and consumed JSON based RESTful APIs connecting frontend components to backend services.
- Wrote SQL queries to manage and validate application data across 5+ applications.
- Worked with supervisors and project stakeholders to assess requirements and scope deliverables, reporting progress through iterative development cycles.
- Produced technical documentation covering environment setup, configuration, and deployment to support team collaboration and onboarding.

Junior Software Developer

June 2022 – July 2023

Petpooja Food Services Private Limited.

Ahmedabad, India

- Performed full stack development on a SaaS POS platform (React, TypeScript, Node.js) running in production for 500+ restaurant clients, building and maintaining features across client and server side code.
- Improved UI load time by 40% through performance profiling and optimization, directly addressing platform scalability under client load.
- Built RESTful API endpoints against Swagger documented specifications, collaborating with the backend team on endpoint design and data contracts.
- Wrote SQL queries to maintain data integrity across transactions and customer records.
- Worked in a fast paced Agile environment with QA and operations, participating in sprints, debugging sessions, and peer code reviews.
- Used Git throughout for branching, code review, and release management across a multi developer team.

Projects

Apex Rentals – Full Stack Car Rental Platform	2024–2026
<i>Tech Stack: Next.js, Node.js, MongoDB/SQL, REST APIs, Linux, Docker, GitHub Actions</i>	
• Led the project through all phases independently, from requirements and architecture through implementation, testing, and deployment. • Built a responsive web application from the ground up, developing client side components in Next.js and server side RESTful APIs in Node.js covering authentication, booking, and administrative functions. • Implemented authentication, authorization, and input validation across client and server side layers to protect user data and transaction integrity. • Designed the database schema and wrote SQL and MongoDB queries supporting rental transactions, customer records, and reporting. • Set up a CI/CD pipeline with GitHub Actions including automated test coverage validating functionality on every commit. • Deployed the application to a Linux environment, configuring the runtime, environment variables, and Docker containers, and handling deployment and service configuration through to production. • Evaluated open APIs and off the shelf libraries against custom implementation to maximize development efficiency. • Used GitHub Copilot and Claude Code throughout as part of an AI assisted workflow, applying prompt engineering to accelerate delivery.	

Education

Postgraduate Certificate – Full Stack Software Development	2023 – 2025
<i>Lambton College</i>	<i>Sarnia, Ontario</i>
Master of Computer Science	2020 – 2022
<i>Hemchandracharya North Gujarat University</i>	<i>India</i>
Bachelor of Computer Applications (Computer Science)	2017 – 2020
<i>Hemchandracharya North Gujarat University</i>	<i>India</i>

Certifications

AWS Certified Developer, Amazon Web Services – November 2024
Project Management Professional (PMP), Project Management Institute – December 2023
Version Control with Git, LinkedIn Learning – August 2022
